

**AMENDMENTS TO THE ABSTRACT:**

Title: On page 30, replace the title to read in full as follows:

**METHOD FOR PREVENTING LOADING AND EXECUTION OF ROGUE  
OPERATING SYSTEMS IN A LOGICAL PARTITIONED DATA PROCESSING  
SYSTEM**

On page 30 please replace the Abstract paragraph to read in full as follows:

A method for managing operating systems. A request from an operating system is received in the multi-partitioned data processing system to register for access to hardware in the multi-partitioned data processing system. The request includes a key code for the operating system. A determination is made as to whether the operating system is an authorized operating system using the key code in response to receiving the request. The operating system is registered if the operating system is the authorized operating system. Otherwise, the operating system is terminated.
